Lundy Findlay Appointed New Vulcan Fire Chief

Sam McLeod has tendered his resignation as fire chief of the Vulcan Fire Department, due to being transferred by his company, Central Gas Utilities Ltd., to Melville, Sask. At a special meeting of the fire department, held in the town office Sept. 13 and convened by Mayor William Munro, a new fire chief was appointed in the person of J. Lundy Findlay, who has been a member of the fire department for the past eight years.

Harold Fox and Charlie Budd were chosen as deputy chiefs. Other members of the fire department are Pete Schuler, Paul Sawicki, Russ Lawrence, Lorne Henry, Robert Johnson, Paul Katona, Dale French, Alex Grant, Bob Petrosky, Bert Daniels, Don Larkins, Leonard Hart, Jim Berg, H. Robertson, Ken Gatenby, Roy McLennan and Ed Nelson.

Regular fire practices will be held the first Wednesday of each month and additional special training will be arranged for the next three weeks.

Plans made for Fire Prevention Week, Oct. 8-13, include an inspection of all business places in Vulcan. Firemen working in pairs will also call at each home offering to check for fire hazards if the occupants so desire. Inspections will be made at all public buildings and fire drills will be held at both schools.

FIR TREE NAMED FOR DOUGLAS

Douglas fir, the largest timber tree grown in Canada, and sometimes found near Calgary, receives its name from David Douglas, the first person to describe the tree to the scientific world. Douglas was a Scottish botanist who, over one hundred years ago (the first came to America in 1823 and left in 1883) spent several years in British Columbia and the northwestern United States.

During this time he discovered a hundred and fifty species of plants previously unknown to science, and he introduced into cultivation in the British Isles two hundred and seventeen species, including the Douglas fir, the sugar pine, and the cedwood. The Douglas fir was first discovered by A. Menzies, the surgeon of Capt. Vancouver's in his voyage of discovery, but was introduced to Europe by Douglas.

The waters of all the hot springs in the mountain National Parks contain principally dissolved gypsum, limestone and epsom salt, and closely resemble in chemical analyses the famous sulphur springs of Bath, England.

STILL TOO MANY FARM ACCIDENTS

Farm accidents in Alberta resulted in 37 deaths during the first six months of this year, or three more than the corresponding period of last year, according to a summary compiled by W. J. Perkins, farm safety director for the Alberta Safety Council.

The summary reveals that nearly half of the fatalities resulted from fires which took 16 lives in various parts of the province. In the comparable period of last year farm fires caused 6 deaths.

On the other hand, tractor deaths showed a substantial decline this year, due in large part, it is believed by the officials, to the campaigning by the Alberta Safety Council for safety and the holding of tractor tipping demonstrations.

In the six months ended June 30 this year there were three deaths in tractor accidents, compared with 14 in the same period of last year. For the whole of 1955, there were 22 fatalities in tractor mishaps.

The report shows that six deaths were due to poison gas or carbon monoxide, as against two a year ago.

Deaths due to firearms numbered two, one less than a year ago. This year, the ASC featured the safe use of firearms as the subject of a farm essay contest in which more than 30,000 rural school children participated.

There were two deaths in connection with the operation of various farm machines, two caused by farm animals, one from a fall and five due to miscellaneous causes.

A further analysis of the first six months of this year shows that four of those who lost their lives from fires were in the 10 to 19

Good Registration Expected

First Aid Courses To Start In October

Arrangements are being made to hold a St. John's Ambulance first aid course in Vulcan commencing Friday, Oct. 5. As many as wish may enroll for the course and a heavy registration is anticipated. Meeting nights will be arranged to suit the majority, and classes will be held once or twice weekly. Arrangements will be made for repeating the first one or two classes in the event a late harvest prevents attendance the first week or two.

Several of the local first aiders who now have medallions and labels have signified their intention of taking their instructor's examination for St. John's Ambulance at the conclusion of this course. The idea of forming an auxiliary brigade of St. John's Ambulance in Vulcan will also be explored and considered. The additional instructors, with or without the auxiliary brigade, should make it possible to comply with the frequent requests from other points in the county to hold first aid classes in other communities during the winter and ensuing year.

Enrollments for the Vulcan course now being arranged may be made at the first two classes, but as many of those as possible who intend to enroll are asked to contact Lundy Findlay or Bill Shields so that the starting night will suit the majority and also to give an idea of how many will be taking the course so that suitable accommodation can be arranged.

There has also been a good number of requests that classes be held twice a week to enable to course to be completed in one month. Enrollments have already been received from Champion, Arrowwood and Lomond as well as from Vulcan and district. First aid books and practice bandages will be available the first night and a nominal fee will be charged to cover these items.

years age group, while there were two from 70 to 79, and two over 90. Three of these who died from poison gas were between 10 and 19 and two between 20 and 29.

Those who died from tractor accidents ranged in age from 40-69.

Witnesses Host Toronto Minister

The Vulcan congregation of Jehovah's witnesses was host of Mr. and Mrs. W. S. Spicer, travelling representatives of the Watch Tower Bible and Tract Society of Toronto. Mr. Spicer is an ordained minister of the Witness organization, and with his wife, has carried on evangelistic work throughout the Province of Quebec for over fifteen years, as well as having spent more than ten years in other parts

High Marks For Vulcan Cadet Corps

Reflecting the ability of their Chief Instructor, J. L. Moyer and of S/Sgt. Leonard Hart, the Vulcan Legion Cadet Corps showed the biggest improvement of any Cadet Corps in Southern Alberta during the past year.

Inspection results and standings issued by the Cadet Training Office, Calgary, show that in training, the local corps received 51.3 marks out of a possible 60, in organization and administration, 19 marks out of a possible 20, and on the annual inspection 16.2 marks out of a possible 20, and 4.5 for Youth of the Empire. Total percentage for the year was 94.1% as compared to 54.3% the previous training year.

The Vulcan Corps placed 10th out of 28 Cadet Corps in Southern Alberta and 7th out of 20 rural Cadet Corps. This is considered exceptionally good, particularly in view of the fact that most of the boys were first-year cadets, and the Advocate joins in congratulating the boys and their instructors on this fine showing.

Mossleigh Man Burned While Cleaning Combine

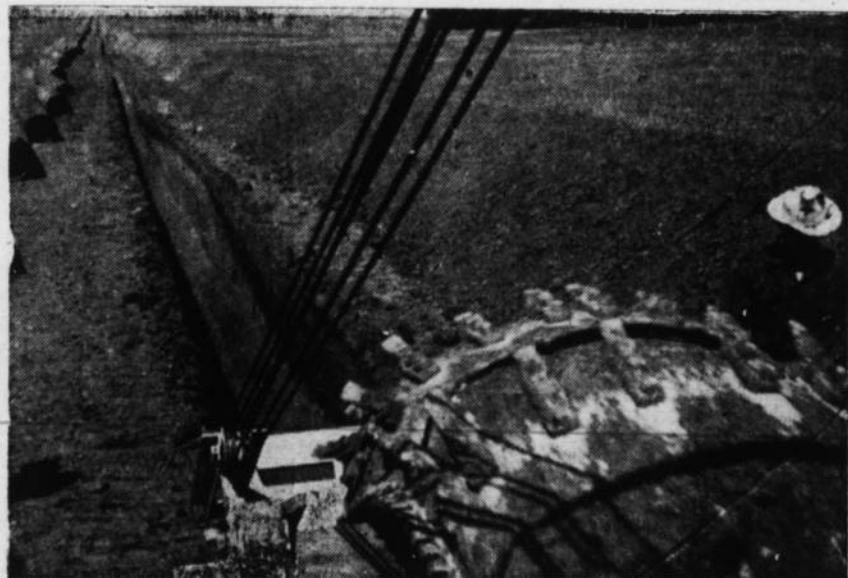

Friends of Cecil Eaton, Mossleigh district farmer, who recently sustained severe burns to his whole right arm, will be pleased to know that latest reports are that he is now making good progress toward recovery, at the local hospital. It was believed that gasoline being used at the time by Mr. Eaton to clean a combine, became ignited from friction set up by the use of a wire brush.

Other workmen nearby witnessed the accident and seized the victim, tearing his burning clothing from him. They then rushed him to the Vulcan hospital where he was treated by Dr. A. D. Tompkins.

of Canada.

In visiting the Vulcan congregation last week, Mr. Spicer is following a routing which takes him to eighteen congregations in southern Alberta. Assistance is given to each congregation in organizational matters and in field ministry.

Durum and Flax Acreages Increased

Probably the most significant change in the crop pattern of this area during 1956 is the greatly increased acreage seeded to durum wheat and flax. At the time of writing prospects appear favorable, and it is hoped that profitable crops will be harvested. The fact that durum is late maturing, tall growing and has relatively weak straw, is plainly visible as harvest approaches. Some fields of durum on the lighter, warmer soils are standing up well and are almost ready for swathing. At the same time durum on some of the heavier textured soils, which are colder and slower in the spring, is very tall, slowly ripening, and often badly lodged. Regardless of the great variation in stage of maturity, apparent yield and lodging, chances for an above average crop appear favorable providing a killing frost does not occur before September 15th.

Mr. C. L. Sibbald, Director of the Catell Durum Institute has been warning durum producers to make sure the crop is mature before it is harvested. Apparently green kernels are more objectionable in durum than in hard spring wheat. The variety Stewart does not shatter readily and may be safely left until maturity. Cracked kernels are objectionable in durum and care should be exercised when threshing to keep cracked kernels down to a minimum. Decreasing the clearance between cylinder and concaves will help.

Even though durum is on a five bushel quota, market prospects appear favorable. In the fall of 1955 the Canadian Wheat Board found it necessary to cut the price of Class II durum from \$2.75 per bushel at the Lakehead to \$2.54. However, last May a good demand for durum developed in European countries which resulted in the price being increased to 2.67. Judging by this price increase we may assume that (1) Canadian durum is in good demand, and (2) that world stocks of durum are low.

Mrs. Gallagher brought three recommendations from the executive, these being: (1) That we would like to send a representative to a students union meeting to see how we could work more closely with them; (2) That the Home & School clean the teacherage before the teachers moved in in the fall; (3) That during the year we work on a set of bylaws for our association.
